

WHERE'S THE LINE?

Identifying Species Distribution
and Management Thresholds in
the Sea

DR. SARAH HENKEL

Dr. Sarah Henkel is a benthic ecologist at the Hatfield Marine Science Center and Director of Environmental Research at the Northwest National Marine Renewable Energy Center at Oregon State University. Her research addresses potential effects of human activities (e.g. marine renewable energy installations, marine reserve designations, coastal development, invasive species, climate change) on benthic habitats and organisms. Before moving to Oregon State University, Sarah worked at the California Ocean Science Trust working on projects related to invasive species, oil platform decommissioning, and marine protected areas.
