

DEPARTMENT OF INTEGRATIVE BIOLOGY SEMINAR

# ECO-EVOLUTIONARY DYNAMICS IN GALAPAGOS

**DR. ANDREW HENDRY**

ASSOCIATE PROFESSOR, MCGILL UNIVERSITY  
CURATOR OF FISH, REDPATH MUSEUM

The Hendry Lab is focused on ongoing interactions between ecology and evolution, specifically how ecological changes influence evolutionary dynamics (eco-to-evo) and vice versa (evo-to-eco). The lab conducts work on both arrows of causality in multiple natural systems, most frequently in lake versus stream stickleback, high-predation versus low-predation guppies, and Darwin's finches.
