

DEPARTMENT OF INTEGRATIVE BIOLOGY SEMINAR

RAPTORS, RODENTS, AND THE DESERT WEST

Historical and Paleoecological Insights
in a Dynamic Landscape

DR. REBECCA TERRY

The Terry Lab is interested in the temporal and spatial responses of terrestrial communities to changes in climate and anthropogenic land-use over modern, historical, and paleontological time-scales. Their research integrates the perspectives, tools, and data archives of biology and geology to investigate the structure and dynamics of modern, historical and ancient populations and communities.
