

# Ecology, Evolution and Conservation Biology Seminar Series

Winter term 2024  
Wednesdays, 4:00 p.m.  
LINC 302

This pair of 1-credit courses comprises an EECB seminar (FES/BOT/FW/IB 507) each Wednesday from 4 to 5pm, and a preceding discussion group (FES/BOT/FW/IB 599) Tuesdays 4 to 5pm.

Course Faculty: Matt Betts, Tiffany Garcia, Andy Jones, Taal Levi

## Sponsoring Departments and Units

Fisheries, Wildlife, and Conservation Sciences, College of Forestry, Forest Ecosystems and Society, Botany and Plant Pathology, Integrative Biology, OSU Research Office

**January 17 // Bears, salmon and people; applied conservation science in the Great Bear Rainforest**  
Chris Darimont, University of Victoria

**January 24 // Simulation-based inference for ecology and evolution**  
Peter Ralph, University of Oregon

**January 31 // "Psychologically wise" strategies for connecting conservation science and climate action**  
Megan Jones, Oregon State University

**February 7 // Local and Global Biodiversity Monitoring with the Internet of Animals**  
Roland Kays, North Carolina State University

**February 14 // Conserving genetic diversity of at-risk species across the data-availability spectrum**  
Brenna Forester, US Fish and Wildlife Service Division of Endangered Species

**February 21 // Generalization vs Specialization in Computer Vision for Ecology**  
Sara Beery, Massachusetts Institute of Technology

**February 28 // Climate and livestock mediate effects of wildlife on landscape-level disease risk**  
Hillary Young, UC Santa Barbara

**March 6 // How to Talk About Conservation So People Will Listen**  
Michelle Nijhuis, Environmental journalist and best-selling author of *Beloved Beasts: Fighting For Life In An Age Of Extinction*

**March 13 // Toward an integrated science of human-wildlife coexistence**  
Neil Carter, University of Michigan
