

DEPARTMENT OF INTEGRATIVE BIOLOGY SEMINAR

# EVOLUTIONARY AND ECOLOGICAL PERSPECTIVES ON BIODIVERSITY FROM HIGH-ELEVATIONS AND LATITUDES

**DR. SCOTT HOTALING**  
POSTDOCTORAL RESEARCHER  
KELLEY LAB, WASHINGTON STATE UNIVERSITY

Dr. Hotaling's research centers around understanding what lives where in cold places, how they've adapted to those environments, and their future given a rapidly warming climate and receding cryosphere. His work requires an integrative skill set, talented collaborators, and field work in spectacularly beautiful, and spectacularly threatened locales.
